# Universal Crack Tester

## Pressure & Vacuum Tester for Heads & Blocks

- Fast and efficient dual testing for complete peace of mind
- Innovative design for quick & easy mounting
- Simple adjustment makes mounting of different sized heads & blocks equally easy
- Fully rotational for easy thermal shock testing
- Unobstructed access simplifies visual observation
- Coolant ports easily sealed with selection of plates
- Complete dual test procedure, including mounting, in less than 15 mins for most heads
- Takes heads and blocks up to 1070mm long
- Dimensions: 1050mm high; 1400mm long; 600mm wide

*See independent review in Engine Repair & Remanufacture  
(January 2011)*

*Innovative design simplifies crack testing for engine reconditioners  
Truly universal - accepts heads and blocks up to 1070mm in length*
